

# NEW ZEALAND FIRE SERVICE AUCKLAND FIRE REGION

## Region Notice 121/2008

DATE: 2 December 2008  
TO: All Staff  
FROM: Brian Butt – Fire Region Manager  
SUBJECT: Fire Risk Management Officer

---

Gazetted vacancy 139/2008 advertises Fire Risk Management Officer vacancies for Auckland Fire Region.

Some staff have queried this role with both Region Office and the National NZPFU office essentially asking whether this “is a new role being applied here in Auckland.”

I can advise the title Fire Risk Management Officer is the new term applied to our Fire Safety Officer role. Staff may be aware that the process to review our Fire Risk Management functions resulted in the new title of Fire Risk Management Officer and a revised position description that is to be applied nationally. All current Fire Safety Officers will be encouraged to move to the new title and position description.

As a result of that review, Region have been holding off advertising vacant Fire Safety roles which has caused some challenge for all concerned. Now that this part of the review is complete, we have advertised vacancies under the new title and national position description.
